DAVID OPOKU MENSAH

Software Developer

Profile

I am a hardworking and disciplined individual with a degree in pharmaceutical science. Driven by my love for problem-solving and technology, I have a strong desire to contribute to the tech world. I approach every opportunity with respect and full commitment. I am seeking a role that will challenge me, satisfy my curiosity in programming, and fulfil my eagerness to learn and excel.

Employment History

 - Tailoring tutoring method based on age and ability and maintaining

Projects

- [NC News Back-End API](#) - SQL | TDD | Javascript | Render | Express
Created and hosted a fully functioning API from scratch using the MVC model which in brief allows fetching of articles. I also included tests which ensures the api responds with appropriate data or error as expected.
- [NC News](#) - React | Javascript | HTML | CSS
Created and hosted a fully functioning front -end application. The intention here was to mimic reddit as in allows users to view articles which are divided by topics and each article has user-curated ratings from upvotes and downvotes using the API created in the above project. Users can also add comments about an article.
- [React-Native-Jobs](#) - React-native | Expo
Created an application which allows which fetches applicable job data from fairly reliable API and allows users to browse through available jobs and apply for them if they wish.
